REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of features in the claims was not found in the prior art. The prior art (Risc Microprocessor Databook submitted by applicant) taught a processor with a status register (see fig. 6-4 on page 6-5) with a field that contained bits that indicated whether a coprocessor was usable. When the coprocessor was not indicated useable access to the privileged mode registers in user mode was not allowed. Also altering the status register usability field bits was also taught (see section 4.9.3 on page 4-9). However the combination of features comprising a mask register that is writable only when the microprocessor is in privileged state, the mask register specifying ones of the plurality of privileged state registers to be accessible by instructions executing in a non-privileged state as claimed in claim 1, and the variations to this combination of features as claimed in the independent claims 11,16,20,23,26 were not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Coleman whose telephone number is (571) 272-4163. The examiner can normally be reached on Monday-Thursday.
